

SCHOOL DISTRICT 53

MID - TERM

Work Experience Reflection Report

Writing reflections on your work term will help you to deepen your understanding of your work values and beliefs. This should help you to decide what career path will be the most rewarding for you.

Please provide a one-page typed report on your work placement experiences and include the following points in your discussion:

1. What does your job entail? Provide an explanation of what you do on a daily basis and what are the different tasks you've been asked to do this semester.
2. What can you do to "own" the job? How can you put your own personality into the job?
3. In the second semester what do you want to learn, and what skills would you like to gain from this experience?
4. Do you enjoy what you are doing and explain why. What are you going to do to make the job better?
